Weather beautiful.

Arose before day to be ready for trip to Funchal on Island of Madeira. Was on deck before sun-rise and just as we were near the Island. Remained on deck until we reached Funchal and Anchored at 7.20 A.M. Little fishing boats were visible in the early dawn beyond sight of town. Sem grand walls of rock and mountains of bare mountains of rock rised in wild and fascinating confusion with canons between as if the rocks had been cleft asunder to add to the beauty of the scene. great masses of cloud floating through the canons majestically or rising to accumulate and mingle with the mass of Clouds overhanging the Island, & catching the rosy sun beams which transformed them and the great rock Mountains in roseate hues, again like the cliffs on coast of Mark illuminated by an auroraborealis, as I once saw them one night in 1890.
What Wild beauty this Island presents in the early dawn! At 9.30 we crossed the sea pot, us & ohne, in steam launch and after several attemps to land passengers all were safely deposited by the sailors at the foot of a high stone stairs, built against the sea wall, leading to the "landing" above, which was made of great stones forming a pier projecting into the sea and affording a beautiful view of land and sea, from horizon to crest of the peaks crowning the Island.

Dr. Hartley on time. Was most thoroughly X rayed & had a photograph taken of chest, with result- That Diagnosis developed the same shadow on left lung as was discovered in Edinburgh, and that it is was a thickening of some kind on lung; probably the former tuberculosis, years ago, caused this thickening & it had extended to nerve of left side of throat which is a lung nerve, and extends through lungs.

Cunard Steam Ship Co. From Bank to S.S. Co. & paid for, & got my ticket for passage on The Mauretania for July 30.

Doctor at 10.55 A.C. where Dr Hartley met me, and he & Dr gave me the most thorough examination of chest and head which I have ever had: Put x ray bulb in my mouth: had me close lips on it, and covered me with black cloth, under which they got themselves, and examined throat etc. Then Dr D. applied x ray to my "half closed" eye lids, above ball of eye, and they examined that portion to see if there was disease there causing nasal trouble. "All well." A little bronchitis was present, and inflammation in nose, but no serious trouble. Paid Dr £4. and some shillings – forget how many.

Dr Hartley drove me to his office and gave me report of their consultation after the examination. No cancer, absolutely; nor tuberculosis baccilli. The thickened spot in lung – had caused inflammation around it, which perfect rest; sunshine; Open air life, avoidance of draughts would cause it to subside. The left vocal cord had become paralyzed by pressure from spot in lung; but rest of voice & body would strengthen the right cord, not affected at all by spot: & it would grow toward the left and my voice would improve much. But rest was necessary

Dr Hartley £1. 10. His charge for his services. Dr has also a lady clerk & a trained nurse.
